

CIRCULAR ECONOMY & SUSTAINABLE LIFESTYLES – CONNECTING THE DOTS

The way we live our daily lives – our choices, habits and context within which we live – have a profound effect on our planet, our communities and our wellbeing. Shifting towards more sustainable and attractive lifestyles to be mainstreamed in policy making, business models and education are core components in implementing the Paris Climate Agreement and Agenda 2030. Yet we are far away from decoupling economic growth from environmental degradation and negative social impact at scale under the norm of linear “take, make, dispose” model of production.

This event connects the dots of Circular Economy and Sustainable Lifestyles from a policy-, business- and research perspective. Speakers include: Governments of Japan, Sweden and Norway, companies Filippa K and IKEA and research institutes, IGES and SEI. Come and exchange experiences with us and discuss innovative solutions and core aspects to move towards sustainable lifestyles through upscaling of a circular economy! The outcome of this event will be feed into the work of the 10-Year Framework of Programmes on Sustainable Consumption and Production (10YFP) Sustainable Lifestyles and Education Programme co-led by the Japanese and Swedish governments.

AGENDA:

9:00	Registration
9:30	Welcome
9:45	(Presentation) Sustainable Lifestyles and Education (SLE) Programme - How we work to deliver impact on the ground

Sweden

Marianne Gjörv
Senior Advisor,
Norwegian Environment
Agency
Norway

About the Sustainable Lifestyles and Education (SLE) Programme: The 10 YFP/One Planet Network SLE Programme is a global platform to promote and scale up sustainable lifestyles. It brings together and helps to amplify existing and foster new initiatives and partnerships, projects and activities in response to regional and national (and sub-national) priorities and needs. The programme is co-led by the Governments of Japan and Sweden, in partnership with a Multi stakeholder Advisory Committee representing international organisations, business, policy, and research. The programme is coordinated by the Institute for Global Environmental Strategies (IGES) and the Stockholm Environment Institute (SEI) on behalf of the co-leads.
